INTRODUCTION

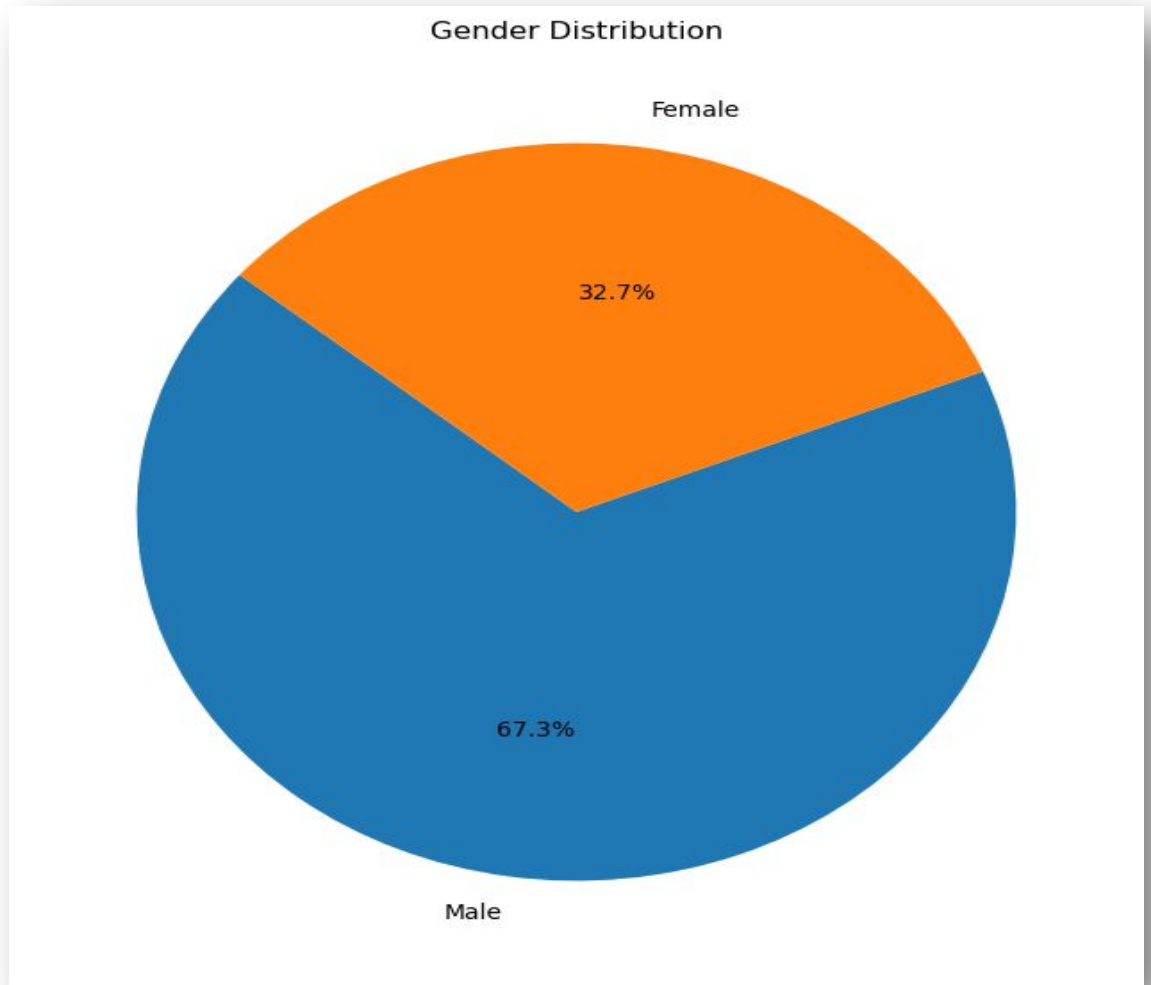

Motivation

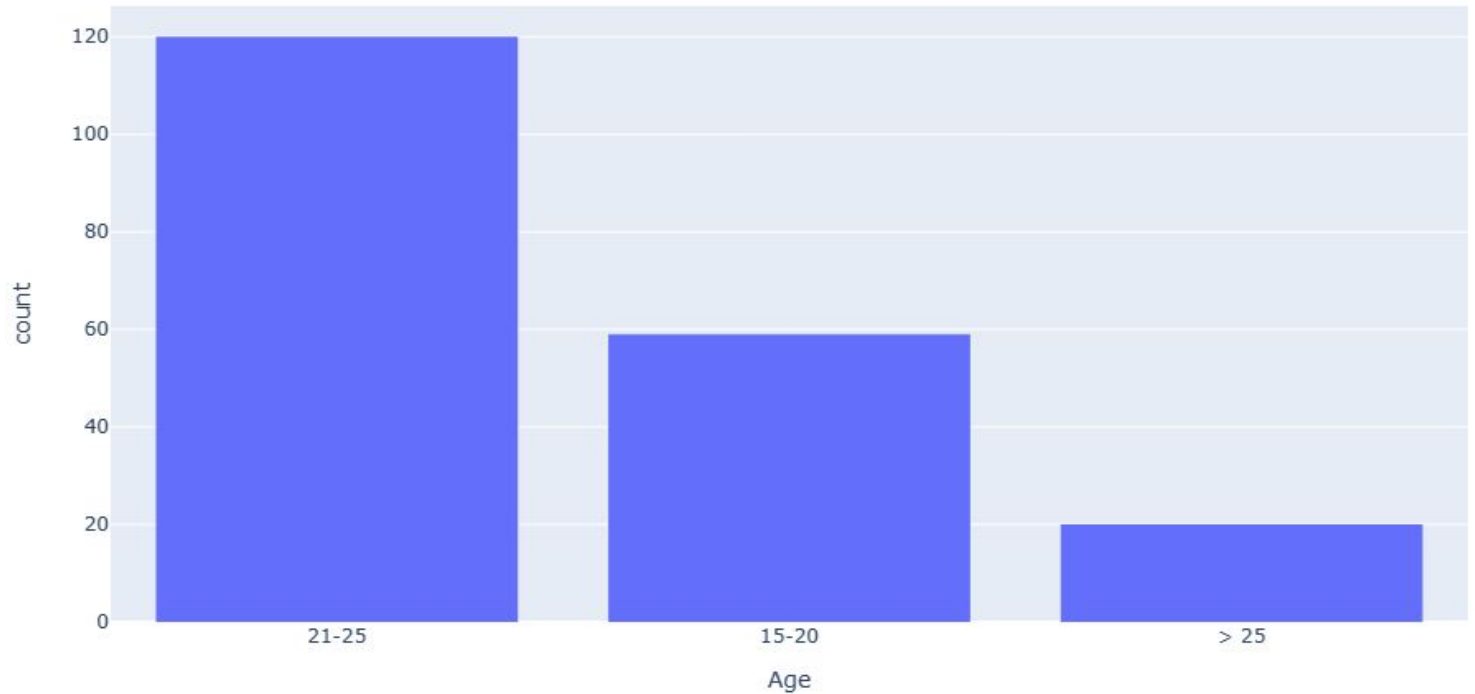

DEMOGRAPHIC

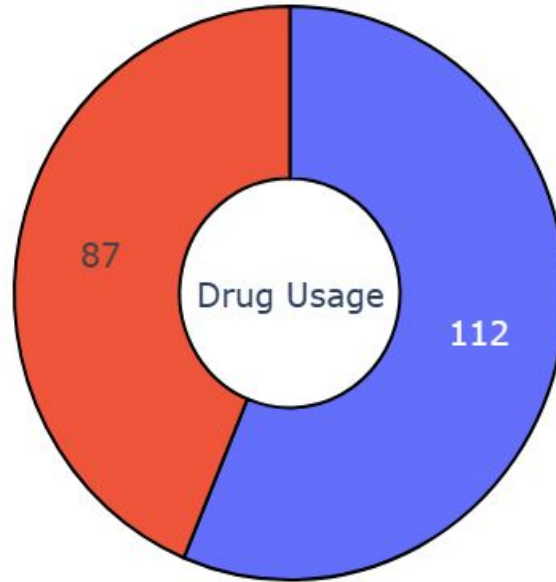

GENDER DISTRIBUTION

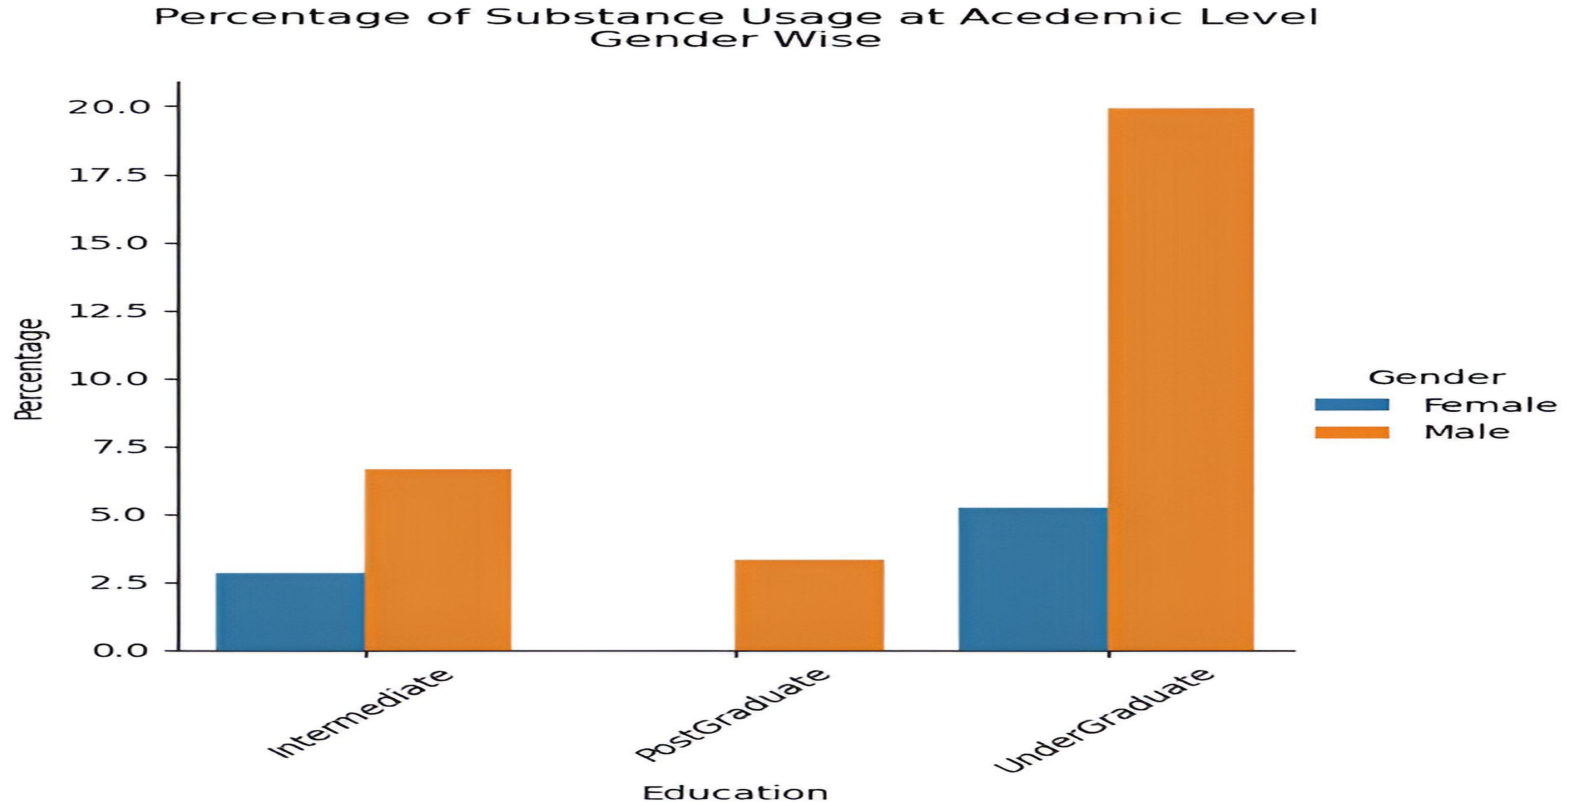

Age Distribution

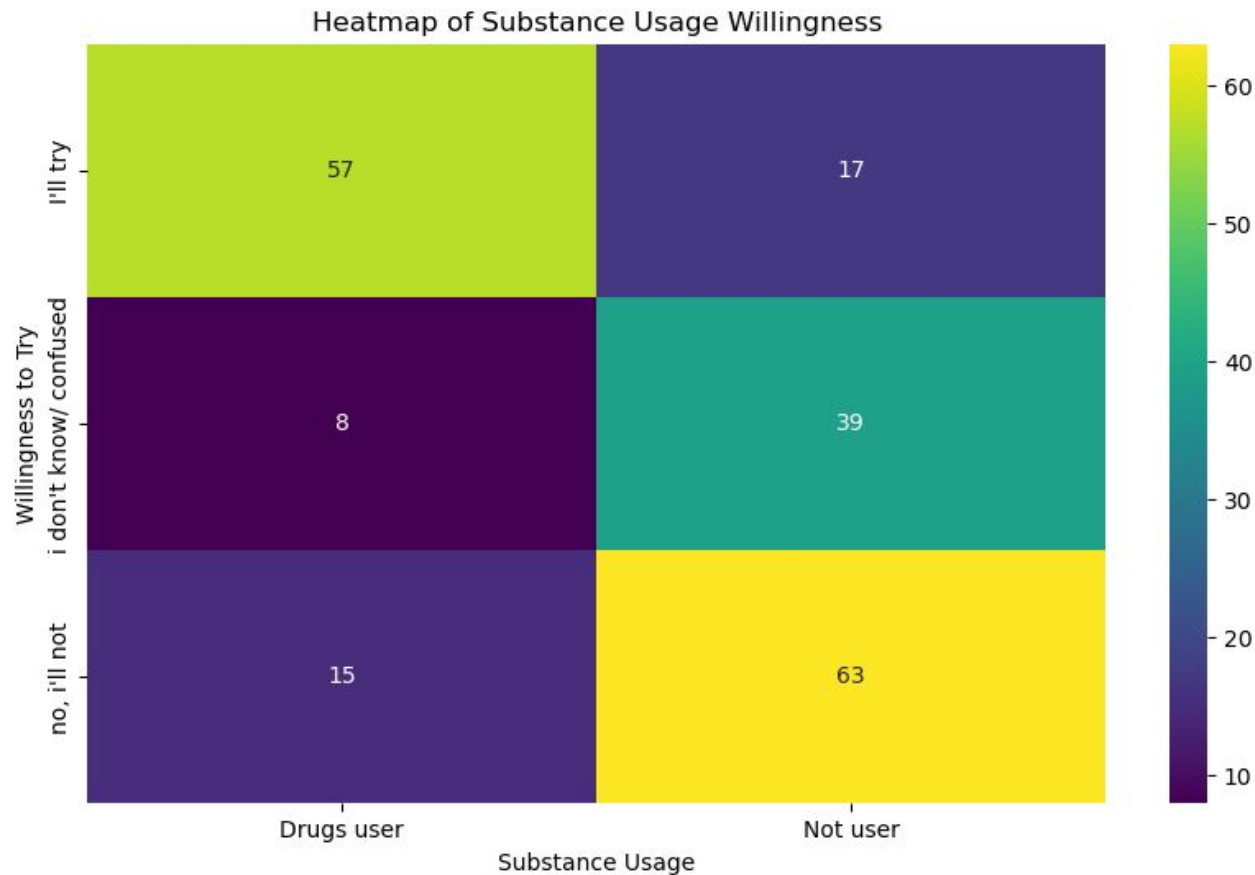

Ever Taken Drug

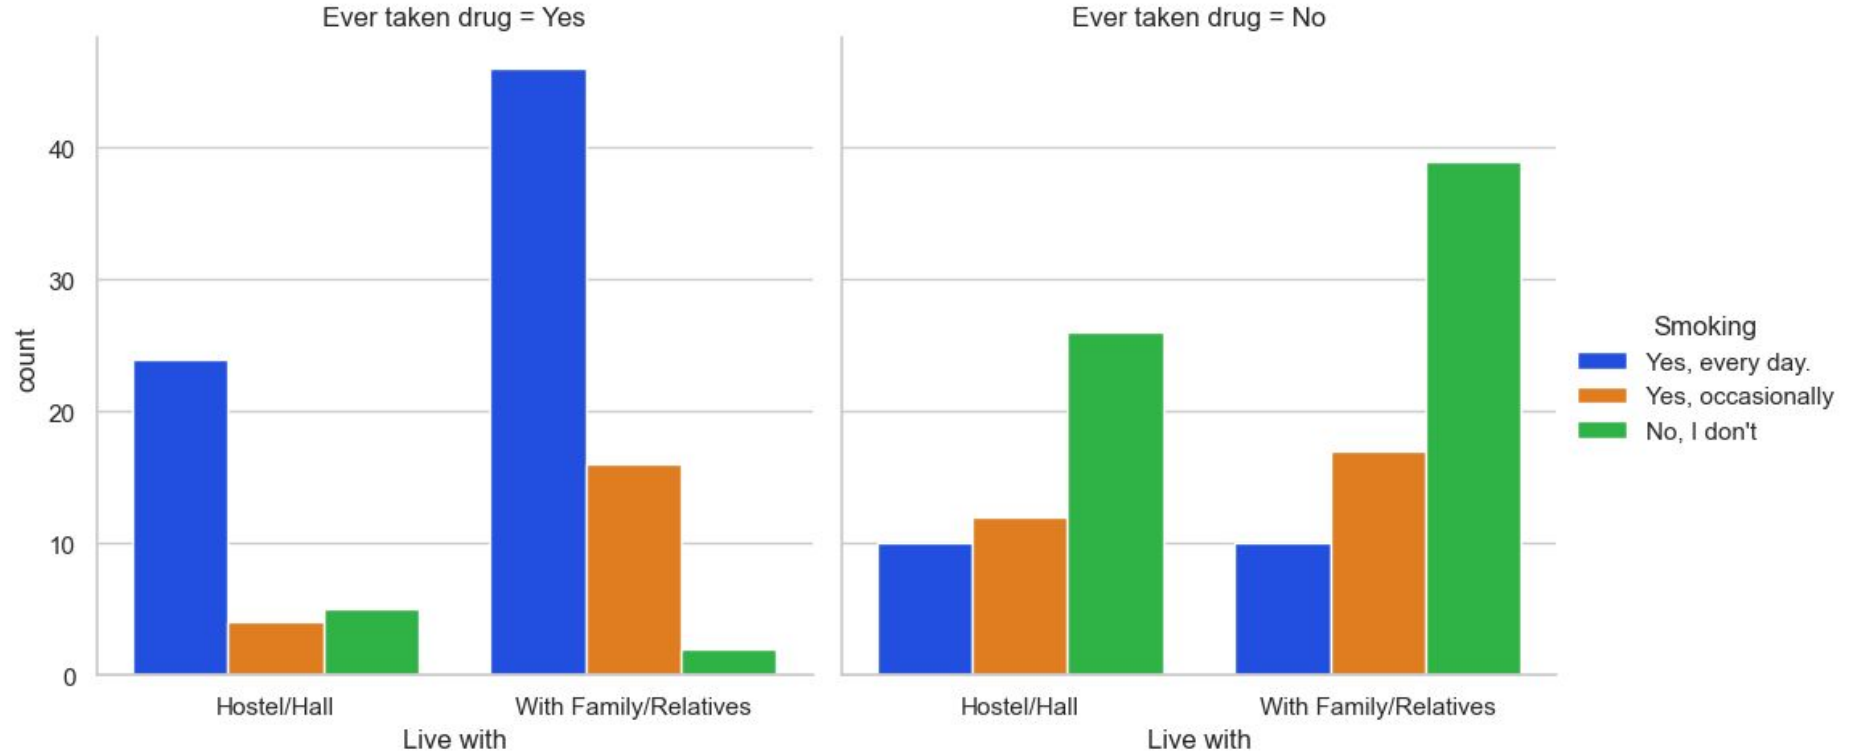

WHAT PROPORTION OF GENDER USED DRUGS AT CERTAIN ACEDOMIC LEVEL :

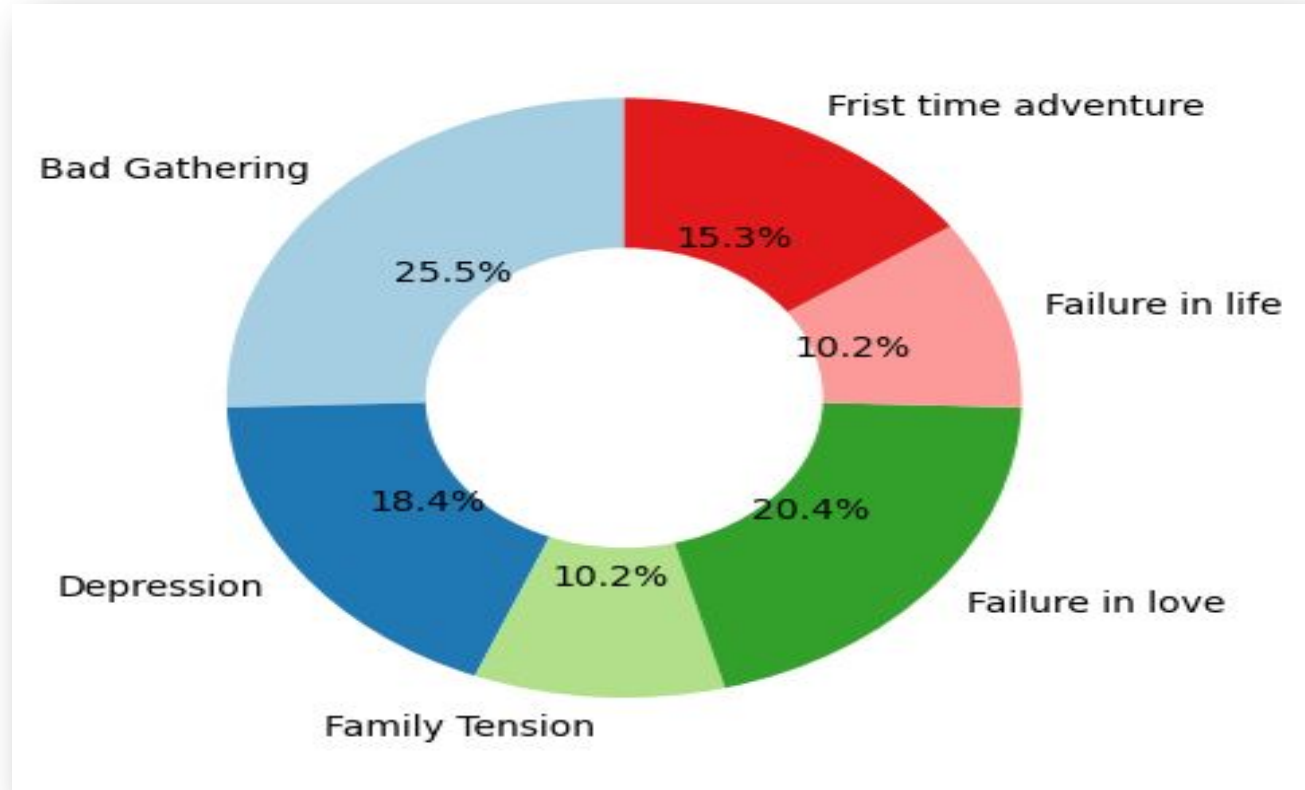

Willingness to Try Drugs

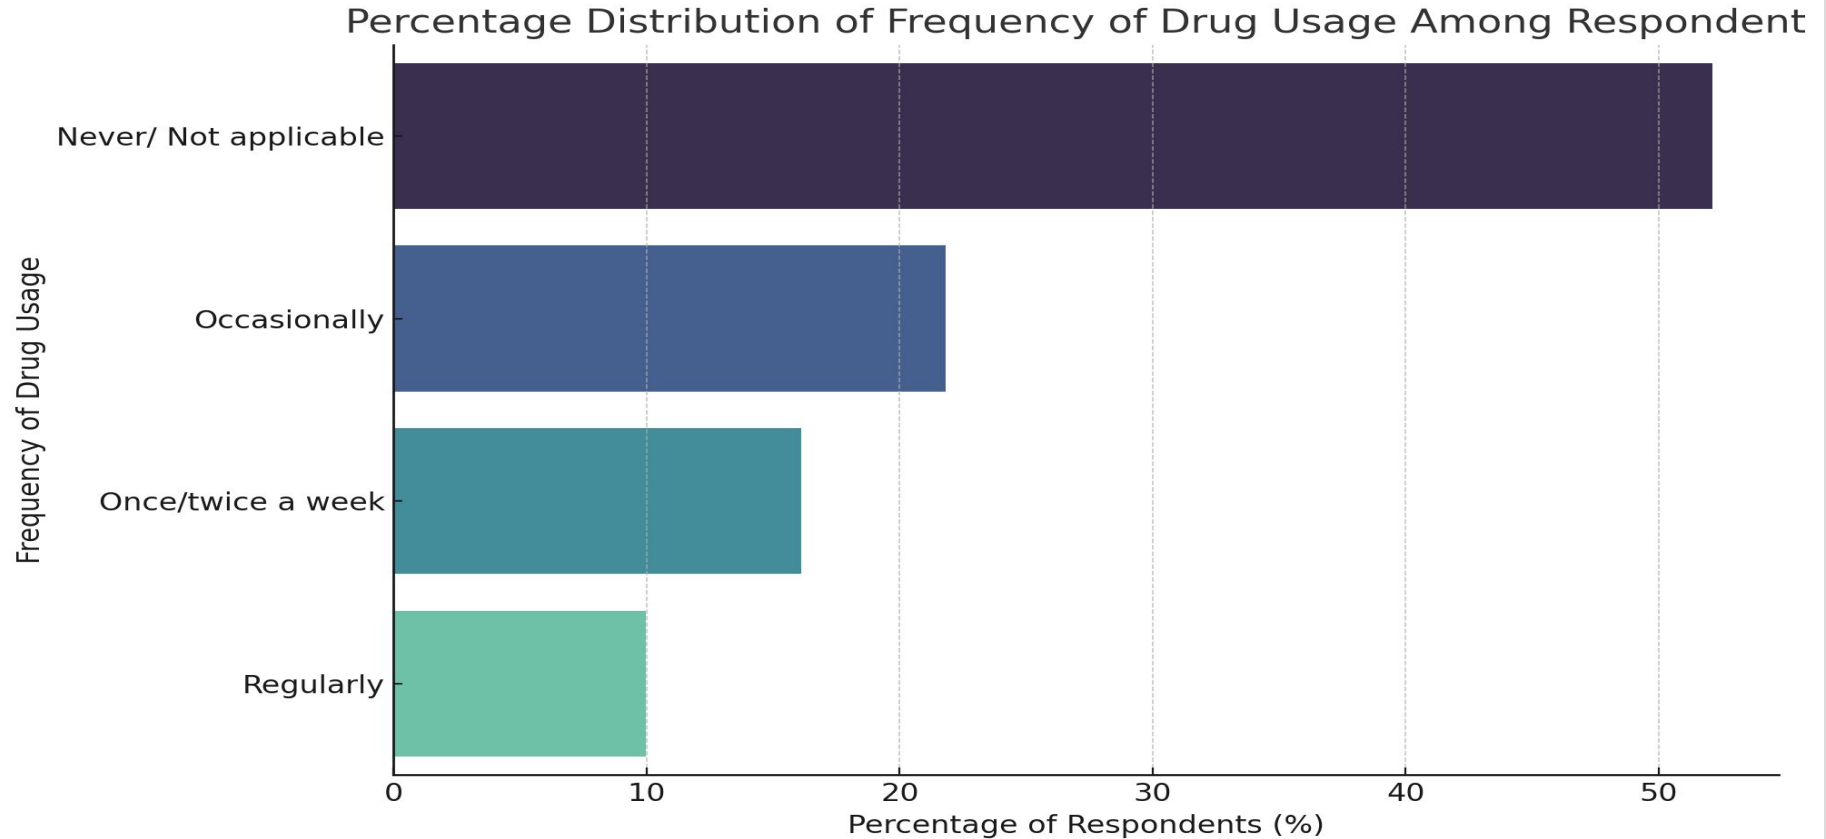

Hostelize Vs Smoking

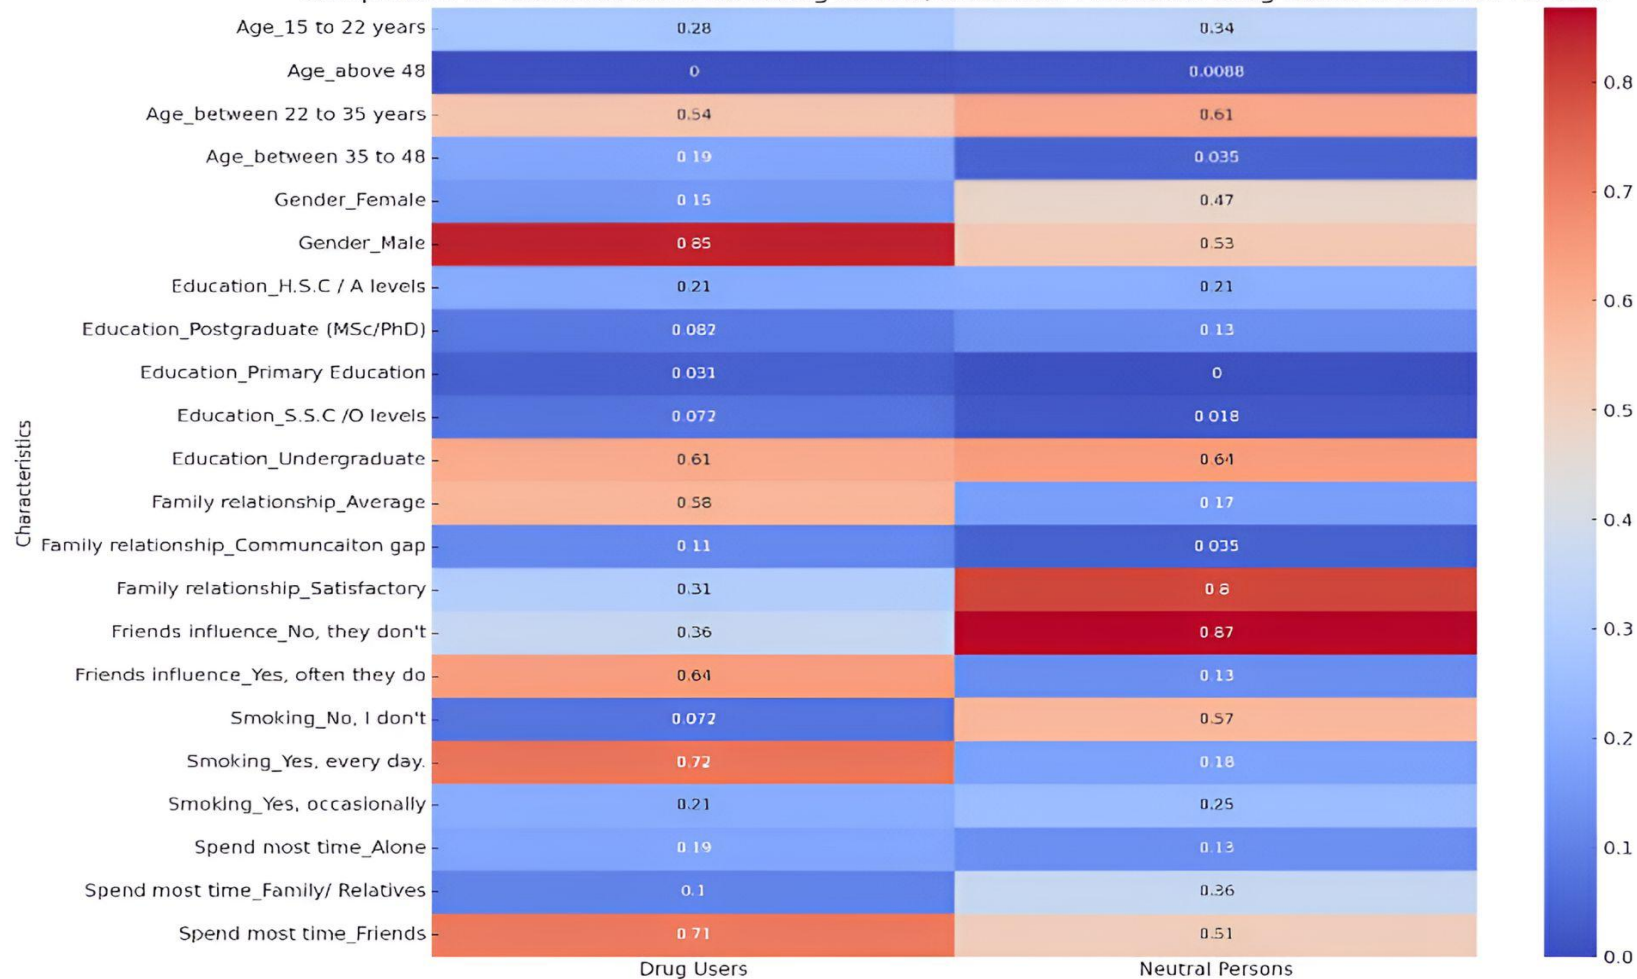

Reason Behind Drug Abuse

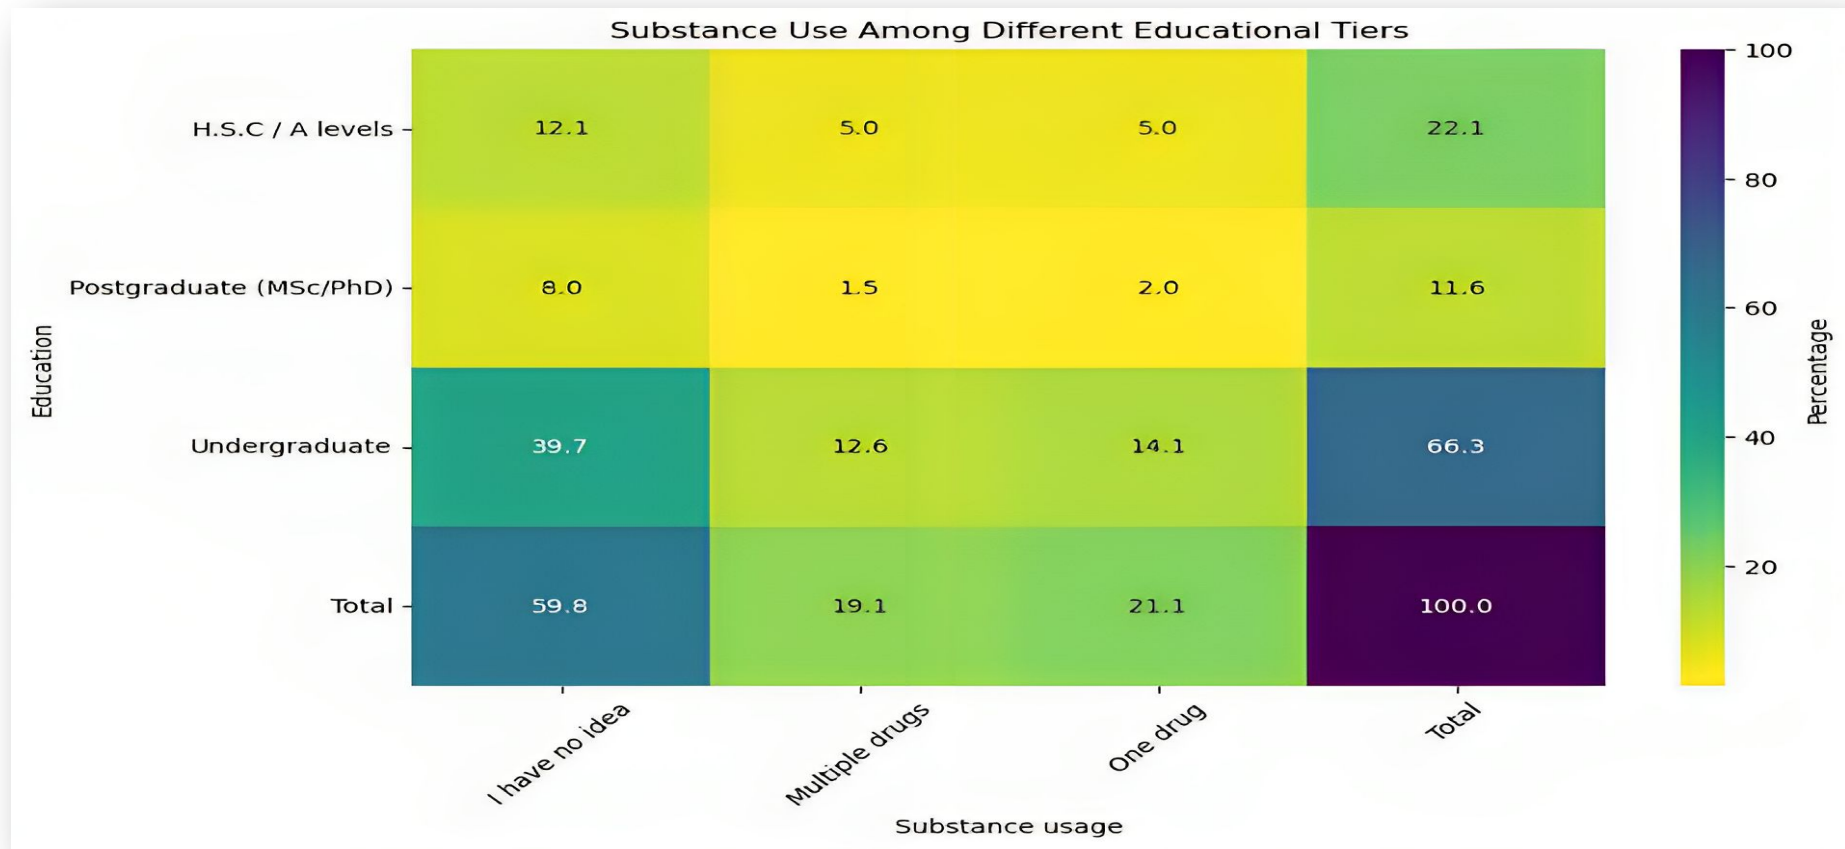

Frequency of Drug Usage Distribution

Comparison of Characteristics Excluding Mental/Emotional Problems: Drug Users vs Neutral Persons

DRUGS USAGE AMONG DIFFERENT EDUCATIONAL LEVEL

ASSOCIATION BETWEEN DRUGS USAGE AND SUICIDAL THOUGHT

H0 : NO ASSOCIATION (independent)

H1 : ASSOCIATION AXIST (dependent)

**CONCLUSION :: DRUGS ADDICTED AND SUICIDAL THOUGHTS
AND DEPENDENT**

Does Bad Environment Effects

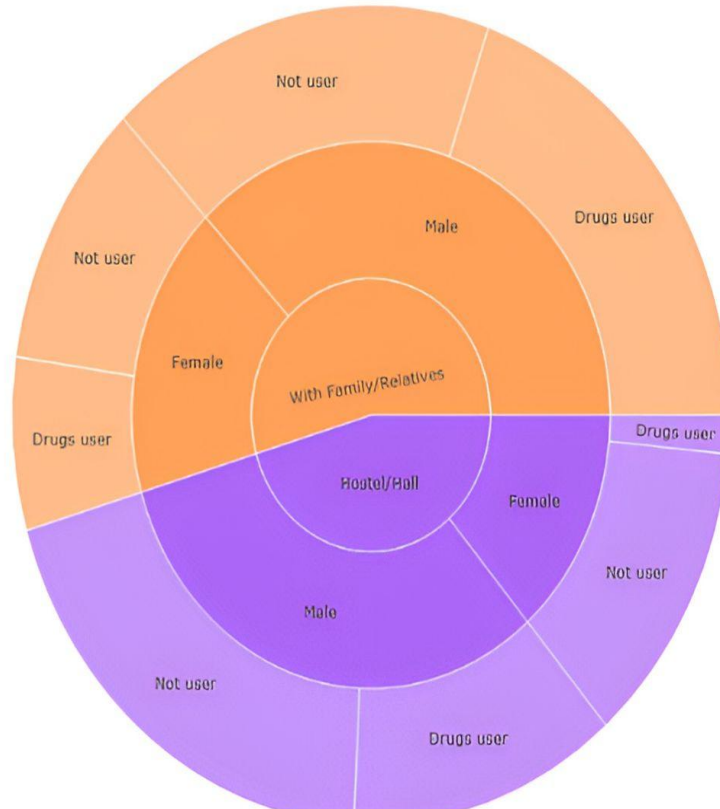

H₀ :: STUDENTS are independent to Environment

H₁ :: STUDENTS Are dependent to Environment

CONCLUSION :: Students are dependent to bad Enviroment

on

Drugs usage in Hostels

H₀ : $P(\text{Female}) \leq P(\text{Male})$

H₁ : $P(\text{Female}) > P(\text{Male})$

CONCLUSION :: $P(\text{female})$ is less or equal to $P(\text{Male})$

Machine Learning Model

CONCLUSION
